Subject: 35th Avenue Questions

Hey Jennifer,

Could you or Rick Jardin answer any of the following?

- Approximately when did EPA begin acting under its CERCLA authority at the 35th Ave site?
- What metals were the soil tested for at the very beginning? When did testing become limited to RCRA 8 metals?
- Was Hudson school ever tested for manganese or cadmium? If so, when was the last time they tested for either?

Thanks so much!!

Jennifer:

My responses in red:

-What metals were the soil tested for at the very beginning? When did testing become limited to RCRA 8 metals?

RCRA 8 metals were tested between 11/8/12 – 6/25/13

Arsenic and Lead have been tested throughout

Aluminum and Iron were also tested between 7/7/14 – 3/12/15

We've only ever tested for the TAL metals when we did PRP sampling. 4/2015

-Was Hudson school ever tested for manganese or cadmium? If so, when was the last time they tested for either?

We've never test Hudson School for manganese or cadmium
